EDMONTON BULLETIN, SEPTEMBER 25th, 1893.

NEBRASKA DELEGATES.

A. E. Hetherington, Dominion government immigration agent at Creighton, Nebraska, arrived on Monday's train, accompanied by two delegates from that state, sent by a combination of about sixty families who desire to remove to the Northwest, to see and report on the country. The names of the delegates are Peter Jaffrey of Dickens, Nebraska and T. J. Snide of Papillion, Nebraska. Both are Canadians, Mr. Jaffrey formerly residing at Mount Forest, Ontario, and Mr. Snide in Cumberland County, Nova Scotia. Three other delegates accompanied the party to Red Deer. The delegates visited several districts, in Manitoba and the Territories, particularly the Souris and Moosomin districts but Edmonton was their objective point. They spent Tuesday and Wednesday in driving around the district going to St. Albert, Sturgeon river, Fort Saskatchewan and Clover Bar. They are more than pleased with the country and crops and state that both exceed the expectations they had formed. There is no doubt that their visit will result in a large number of valuable settlers coming to the Edmonton district next summer. Mr. Hetherington says that the general financial collapse in the states has had a great influence in keeping back immigration this year. Many farmers who had a little money in the bank on which they depended to bring them through have lost it by the failure of the banks and they are therefore unable to move. Besides, the financial stringency is so great that it is difficult or impossible to sell for even half value. The general depression is increased greatly by the fact that crops are very light in all but the best portions of Nebraska, while in Western Kansas they are a total failure, and the people will have to be fed during the coming winter, as they have had no crop for two years owing to drouth. Corn is the most successful crop as it stands dry weather best. The price is from twelve to fifteen cents a bushel and the yield not more than 30 bushels per acre. Of course it is chiefly fed to hogs and cattle. Although the winter in Nebraska is shorter than in the Canadian Northwest the season during which cattle have to be fed is longer as the grass dries up in August, and cattle are always fed from the beginning of October. Messrs. Hetherington, Jaffrey and Snide left for the south on Friday's train.

ENGLISH DELEGATES.

The party of English delegates who are visiting Canada in the interests of the promotion of immigration arrived on Thursday's train. They are: John Roberts, North Wales; W. Weeks, Wilts; J. F. Franklin, Notts; Arthur J. Davis, Wilt; T. Pitt, Devon. These gentlemen are all practical farmers, Messrs. Pitt and Franklin are both owners and tenants, while the remaining members of the party are tenants only. They have been induced by the Dominion government to visit Canada and especially the Northwest with a view to their reporting upon its advantages in the old country as a means of inducing tenant farmers holding farms too small to be profitable, to better their condition and prospects by coming to this country. They are accompanied by Thos. Mills of Bangor, North Wales, and F. H. Morde of California, photo artists, who will take views of the country along their route, so as to provide illustrations for any lectures that may be given by the delegates on their return to the Old Country. The party is under the guidance of E. P. Leacock of Manitoba. Their trip since reaching Canada has taken them through Ottawa, Toronto, Niagara, Winnipeg, Killarney, Glenboro, Souris City, Kenney, Brandon, Qu'Appelle, Indian Head and Edmonton, and they will visit other portions of the country on their return. They put up at the Alberta and on Friday forenoon they looked over the town, examining the stores, mills, coal mines, etc. They were particularly struck by the abundance of coal and remarked the favorable influence that it must have on the industrial development of the country. On Friday afternoon they were driven to St. Albert and Sturgeon river, examining the farms and crops. On Saturday they drove to Fort Saskatchewan on one side of the river and returned on the other. On both Friday and Saturday they were accompanied by Mayor McCauley and land agent Anderson. Three of the delegates who accompanied Mayor Mc-

Cauley on Saturday, while passing through Clover Bar settlement, shot 50 prairie chickens. On Sunday the photographers of the party drove to Wetaskiwin, intending to take views along the way, as far as Red Deer, where they will take the train on Tuesday. The remainder of the party left this morning by team for Wetaskiwin. It is to be regretted that the weather was so unpleasant during their visit causing a great deal of discomfort, but being practical men, notwithstanding the weather they saw that the crops were heavy, that the grain had been ripe in good time and that the cattle, horses and sheep were in good condition. They declare themselves better pleased with the Edmonton district than with any other they have yet visited. From Calgary they go to British Columbia, and then return to England.

NOTICE.

Local News,
All the News.

104 PAPERS

— IN A YEAR FOR —

\$2.00.

News of Edmonton and surroundings up to hour of issue.

News of the world by telegraph up to day of issue and from two to five days ahead of any other paper reaching Edmonton.

Controlled only by the proprietor and therefore always ready and willing to speak out for the good of the town and district.

THE BULLETIN is read more generally throughout the Edmonton district than any other paper.

If you want to do business in the Edmonton district you can reach more of the people with a less expenditure of money through the advertising columns of the BULLETIN than by any other means.

Fair advertising rates charged, and like rates to all parties.

No advertising of a questionable nature admitted if its character is known.

THE BULLETIN Printing office is second to none in the Territories. Only first-class type, machinery and paper employed. Printing of all kinds done promptly, neatly and cheaply. Call and see samples of work, and get prices before ordering your printing elsewhere.

A newspaper is not a producing industry, but if properly conducted it assists and stimulates production and progress more than any other single agency of like cost. Money spent towards the support of a newspaper is almost entirely spent within the town in which the paper is published and is therefore not lost to the business of the town.

The local newspaper represents the district in which it is published to the outside world.

Support your home paper, liberally if it deserves support, so that it can give the best possible impression of your town and district as a field for immigration and investment.

There is big money for a new town in having a live and interesting paper.

PROROGATION ADDRESS.

The following is the speech of His Honor Joseph Royal, Lieutenant-Governor of the Northwest Territories on closing the fourth session of the Second Legislative Assembly of the Northwest Territories delivered at Regina on Saturday, 19th September, 1893: *Continuation of the Legislative Assembly.*

During the session now about to close you have discussed a large number of Ordinances and have, among other measures, adopted provisions for the better protection of property, the increased welfare of the Agricultural community and the improved administration of justice. I congratulate you upon the earnestness and care with which you have applied yourselves to these various subjects, and I thank you for the time and labor which at this busy season of the year you have bestowed in the interests of your country. You will, I feel sure, derive the greatest satisfaction from the knowledge that you have discharged your legislative duties to the best of your wisdom and ability, in a manner becoming your high and responsible position. The manner in which the Territorial revenues and the moneys appropriated by Parliament for the use of the territories have been apportioned, will I believe, satisfy the exigencies of the public service. I have no doubt the expenditure will be made with a due regard to economy and efficiency.

Continuation of the Legislative Assembly:
As this is the last public occasion upon which I may expect to meet you, allow me to say that in resigning the administration of the Government of the territories into the hands of my successor, I shall do so with mingled feelings of regret and satisfaction. I shall regret to leave you because I have never failed, even under trying circumstances, to receive at your hands the treatment due to the representative of Her Majesty, notwithstanding the fact that at times our duty appeared to lie in opposite directions. It was mine to carry into effect what I considered to be the Law, as laid down by the Parliament of Canada, for regulating your share of responsibility in the administration of public affairs, and whilst you claimed to exercise a more complete control over the expenditure, that Law placed me in the somewhat invidious position of appearing to oppose the popular requests. Notwithstanding this controversy, no unpleasantness ever arose between me and the Assembly. When on the 4th July, 1888, I was sworn in as Lieutenant-Governor of the Northwest Territories, the functions of that Office were as totally different from those of the Lieutenant-Governors of the Provinces, as they will be from those to be performed by my successor. I was responsible to the Privy Council of Canada alone for all executive acts done in the Territories. The Assembly had hardly a voice in the Government of the country and the Lieutenant-Governor was practically a Political Commissioner under whose direct supervision and authority the affairs of the Territories were conducted and administered. Now all this has been materially changed and hence my satisfaction. The Legislature today practically enjoys the rights and privileges of self-government. Let me congratulate you sincerely upon the wisdom and discretion you have displayed in undertaking your new and important duties. My satisfaction is further derived from the fact that these Territories are at the present time enjoying a measure of peace and prosperity unimagined, if not unequalled, by any other portion of the Dominion of Canada. In this happy condition of affairs, for which we have to thank the Divine Providence, I now take leave of this Assembly.

Continuation of the Legislative Assembly:
In returning to your respective homes let me assure you that you carry with you my most cordial wishes for your personal welfare and for the prosperity of Canada and our common and beloved country.

UNITED STATES CROPS.

The weekly crop report of the United States weather bureau for Sept. 19, contains the following: Except in the northwestern border states, but little rain fell during the week to the west of the Mississippi, and as during the previous week, there are extensive areas over which there has been no rain whatever. Crop conditions are given among others, of the following states:

Wisconsin—Forest fires in the north half of the state caused probable damage of \$5,000,000. The drought is unbroken and little fall seeding has been done yet. Corn is better than expected, and is nearly an average yield; husking has begun. Potatoes are a light crop.

Minnesota—Staple crops are nearly all harvested. Frosts on Saturday morning slightly injured corn, flax and potatoes. High winds in the latter part of the week damaged some grain. Ploughing has been resumed.

Iowa—Little more than a trace of rain fell in the state; corn is practically safe; the average yield is considerably above last year.

North Dakota—Rain in the eastern and northern portions were of benefit to fall ploughing but more is needed. High winds nearly all week, retarding threshing. The storm of the 13th caused much damage in the southeast section. Slight damage was done to gardens by frost.

South Dakota—Frost on the 14th killed vines in the eastern portion; corn is beyond frost damage. Good weather for threshing and for harvesting corn. The crop season is about closed.

What a bushel of maize will yield has been the study of the United States statistician, who finds that from that quantity of maize the United States distiller can extract four gallons of whiskey, of which the retail price will amount to about \$16. This money, the statistician states, is distributed in the following unequal proportions: Whereas the farmer who raises the maize takes \$6.00, the government receives dues amounting to \$3.00, the accounts for M. The distiller retains \$7, and leaves \$4 to the retail dealer. But the railways are not left out of this any more than out of any other transaction in the United States, and pocket the remaining dollar.

The Canada Gazette contains announcements of extensions of Fisher river and Fort Pelly Indian reserves, the reason given being the necessity for more hay and pasture for the increased number of cattle on those reserves.

Sir A. T. Galt died at Montreal on September 19th, aged 76 years. He was a prominent figure in Canadian politics for many years. He will always be remembered in the Northwest as the moving spirit in the Lethbridge coal mines.

BREEDING EWES.

The Canadian Agricultural Co. of Calgary are shipping within the next few days, several car loads of breeding ewes and rams to Edmonton. These sheep are for sale to farmers, and will be sold in suitable lots. After remaining in the Edmonton district for a few days, the sheep will be driven south, stopping off at various points along the Calgary and Edmonton railroad. There are no better sheep in the Territories than those owned by the Canadian Agricultural Co., and as nothing but young ewes will be sent, those in want of breeding sheep should not miss this opportunity of filling their requirements. Mr. W. Rutherford, the company's sheep manager, will accompany the sheep.

A VIEW OF EDMONTON.

To the Editor of the Bulletin:
We have been asked to give you our opinion of what we call Canada's Wonderland. All but one of our party are Canadians, and believing in the future of our country are taking a trip through your district seeing for ourselves what is ours by birth and right. We cannot say anything but words of praise for the country we have visited. We have been in parts of St. Albert, Fort Saskatchewan and Beaver lake districts. The crops would gladden the hearts of the worst of grumblers if it was possible to do so. Having been, through the kindness of Mr. Logan of Beaver lake, shown through his store houses and gardens we saw about 2,000 bushels of wheat, oats, barley, peas, flax and buckwheat threshed and stored on the 12th of September, the day of our visit. We also picked ripe corn in his garden, something we have been given to understand could not be grown in the Garden of Canada. We also saw Mr. Logan's sheep, numbering about 150, his cattle number about 300, and horses 150, all in fine condition. We also heard from all settlers words of contentment with their lot and also received the best of welcome where ever we went. We conversed with settlers from the Dakotas, Washington, Ontario, Quebec and the Maritime provinces. They all were loud in their praise of their home and proud of their country. To our friends we would say if you have moderate means and want a home settle in Northern Alberta. We are now going over the Wetaskiwin and Battle river districts and shall report later on our opinion as we go. Truly yours

S. W. Lehman, Port Moody, B. C., Jacob Stouffer, Alberta, Ontario, R. E. Golden, Amherstburg, Ontario, Ed. Hogan, Okadale, Washington, Geo. Pearn, Guelph, Ontario.

Latest advice from Sitka say that the commissioners jointly appointed by Canada and the United States are unable to come to an agreement with reference to the disputed boundary line between Alaska and British Columbia. One of the United States engineers said that it will be necessary to have an arbitration commission appointed to settle this question. Prof. King, of Ottawa, the Canadian commissioner, in accordance with the terms of the boundary treaty between Russia and England, contends that the boundary line is denoted as being the summit of a certain range of mountains about forty miles from the coast line. The American engineers have made twelve trips into the interior and encountered one clear day, when numerous photographs were secured. They aver that no range of mountains exist in that vicinity. Lieutenant Commander Ackley, who has charge of the American forces, is convinced that the mountains range mentioned in the treaty does not exist and that the only way the matter can be amicably adjusted is for an arbitration to consider the claims and surveys of both governments and then establish an international boundary line. The disputed territory lies between the Stikine and Unalak rivers, an area of several thousand square miles, embracing a valuable mining district and the jurisdiction over two excellent salmon streams. The territory is very valuable from a commercial point of view and is well worth acquiring. On account of the wet season setting in, the British and American engineers will return south this month.

Calgary Tribune: In exchanges received from the east a few days ago we find that diphtheria is raging at Moncton, N. B., and at several points in Halifax county, being only too fatal at all the points named. At Stouington, a watering place on the Atlantic coast, between Boston and New York, it is epidemic, driving thousands of visitors from that place. Too strict measures can not be taken in dealing with this disease or with its allied diseases. To neglect any needful precautions is to outrage the communities in which it gains a foothold.
